## Industrial Vacuum Cleaner for the Metalworking Industry

Extend coolant life. Extend machine tool filtration systems by removing chips and swarf. Reduce operator exposure to bacteria and dermatitis. Spill cleanup means a clean and safe shop.

VAC-U-MAX Model 55MW Industrial Vacuum Cleaner for the Metalworking Industry. The 55MW is a complete system for cleaning 100% liquids or liquids with solid particles such as metal chips or shavings. Operators can quickly empty machine tool sumps, machining beds, oil/water separators, parts washers, rinse tanks and clean up liquid spills. Solid particles are separated from collected liquid with the VAC-U-MAX Chip Basket and Liner. This Industrial Vacuum Cleaner will clean up at rates of 1-2 gallons per second (60-120 GPM). With the turn of a lever the 55MW Industrial Vacuum Cleaner will pump out the liquid contents of the drum through the discharge hose to a central filtration system for coolant/oils or approved floor drain.

VAC-U-MAX Model 55MW

**Heavy-Duty Construction:** Rugged, fully welded dolly with large-diameter wheels for rough machine shop floors, powder coat finish with excellent chemical resistance

**Easy to Move:** Dual swivel casters and compact size—only 26" wide—gets close to the machine tools and sumps to keep vacuum hoses as short as possible.

**Fast working:** Clean Up at 60-120 gallons per minute  
Pump-out at up to 14 gallons per minute.

**Versatile:** 100% solids or 100% liquids, or any combination!

**No Moving Parts:** Compressed air-powered vacuums work forever without any moving parts. Available as a pump-out cart for customers who already own a 55-gallon air-powered drum-top vacuum.

**Clean Operation:** Smoothbore hoses prevent accumulation of liquids and chips. Slotted holes in the cart base to prevent pooling of fluids...dispensing nozzle on the pump-out hose puts you in control of where and when the fluid comes out!

**Plug-and-Play:** Includes a VAC-U-MAX Air Operated Industrial Vacuum Cleaner and chip basket with liner and you're collecting and separating liquids / solids in minutes.

**Industrial Design:** Not available in Home Improvement Stores! Powered by cool-running convenient compressed air, no motors to burn out. All-steel construction.

Designed Exclusively for the Metalworking Industry

Heavy Duty Dolly also sold separately with double diaphragm pump can be used with existing 55 gallon Air Operated Industrial Vacuum Cleaner.
